In the Claims:

1.(previously presented) A cleaning composition comprising from 30 to 70 percent by weight of 1-alkyl-2-pyrrolidone, from 25 to 45 percent by weight of a hydrocarbon and from 5 to 25 percent by weight of water, wherein the 1-alkyl-2-pyrrolidone, the hydrocarbon and water are present in amounts such that they are adjacent to an equilibrium phase boundary of a three-component phase diagram such that a change in relative weight percentage of one of the 1-alkyl-2-pyrrolidone, the hydrocarbon and water components by a reduction of 1%wt. or less leads to a change in the number of phases present in the composition, and the composition exhibits self-induced motility when applied to a household substrate.

2.(canceled)

3.(previously presented) A cleaning composition according to claim 1 wherein the 1-alkyl-2-pyrrolidone has 4 to 16 carbons in its alkyl group.

4.(original) A cleaning composition comprising water, a hydrocarbon and a 1-alkyl-2-pyrrolidone, which composition exhibits Marangoni behaviour when exposed to air.

5.(previously presented) A method of cleaning a soiled substrate, comprising the application to the soiled substrate of a composition according to claim 1.

6.(previously presented) A method for the cleaning of soil deposits from household substrates which comprises the step of:
applying to the substrate a composition according to claim 1.

7.(previously presented) A packaged household cleaning product comprising a composition according to claim 1.

8.(previously presented) A cleaning composition according to claim 3 wherein the 1-alkyl-2-pyrrolidone is 1-octyl-2-pyrrolidone.

9. (previously presented) A cleaning composition according to claim 1 wherein the hydrocarbon has at least 5 carbon atoms.

10.(previously presented) A cleaning composition according to claim 9 wherein the hydrocarbon has at least 8 carbon atoms.

11.(previously presented) A cleaning composition according to claim 1 wherein the hydrocarbon has up to 15 carbon atoms.

12.(previously presented) A cleaning composition according to claim 1 comprising 40 to 60 percent by weight of 1-alkyl-2-pyrrolidone.

13.(previously presented) A cleaning composition according to claim 1 comprising 30 to 40 percent by weight of a hydrocarbon.

14.(previously presented) A cleaning composition according to claim 1 wherein the composition comprises a plurality of hydrocarbons.

15.(previously presented) A cleaning composition according to claim 1 comprising 10 to 20 percent by weight of water.

16.(previously presented) A cleaning composition according to claim 1 which further comprises an electrolyte.

- 17.(previously presented) A cleaning composition according to claim 1 which comprise a surfactant, a biostatic agent or a bleach in an amount of up to 1% by weight.
- 18.(previously presented) A cleaning composition according to claim 1, wherein the water the 1-alkyl-2-pyrrolidone and the hydrocarbon co-exist as a single phase without separating from each other as layers.
- 19.(previously presented) A cleaning composition according to claim 1 wherein the composition is in the form of 2 or 3 phases.
- 20.(canceled)
